#### **DETAILED ACTION**

Claims 1-22 are pending.

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112: The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5, 6, 11, 17 and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. These claims recite the limitations such as "if said second customer..." this limitation is vague and indefinite, no limitation is imposed upon the claimed invention.

Claim 12 further recites the limitation "substantially contemporaneously" this limitation is vague and indefinite, no limitation is imposed upon the claimed invention.

Claims 7-10 are dependant upon the above rejected claims and are rejected for at least the same reasons.

Applicant(s) are reminded that optional or conditional elements do not narrow the claims because they can always be omitted. See e.g. MPEP §2106 II C: "Language that suggest or makes optional but does not require steps to be performed or does not limit a claim to a particular structure does not limit the scope of a claim or claim limitation. [Emphasis in original.] " As a matter of linguistic precision, optional elements do not narrow the claim because they can always be omitted.

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1 –28 are rejected under 35 U.S.C. 103(a) as being anticipated by Meyer et al. (US Patent 6,810,389) in view of Boebert et al. (US Patent 5,502,766)

As per claim 1,

Application/Control Number: 10/671,396

Art Unit: 3621

Meyer et al ('389) discloses an electronic system for managing distribution of digital content comprising:

an electronic central rights provider;

at least one electronic consumer device; (Figure 8)

wherein said central rights provider is configured to grant and transmit an electronic master license to said intermediate rights provider wherein said master license includes a right to create a child license for a set of digital content associated with said master license for transmission to said at least one electronic consumer device. (Column 7, lines 40-61)

Meyer et al ('389) does not explicitly disclose an electronic intermediate rights provider. Boebert et al ('766) discloses an electronic intermediate rights provider; (Figure 3,) it would have been obvious to one of ordinary skill in the art at the time of the invention was made to combine the Meyer et al ('389) method with Boebert et al ('766) method in order to provide an additional layer of security

Claim 14, 20 and 22 are in parallel with claim 1 and is rejected for at least the same reasons

As per claim 3,

Meyer et al ('389) discloses an electronic system for managing distribution of digital content, as claimed in claim 1,

Meyer et al ('389) does not explicitly disclose wherein said requesting device is equipped with a digital rights management system which is configured to use said account key to decrypt said encrypted package and utilize said digital content. Boebert et al ('766) discloses wherein said requesting device is equipped with a digital rights management system which is configured to use said account key to decrypt said encrypted package and utilize said digital content; (Figure 3,) it would have been obvious to one of ordinary skill in the art at the time of the invention was made to combine the Meyer et al ('389) method with Boebert et al ('766) method in order to provide an additional layer of security

#### Allowable Subject Matter

Claims 2, 4, 13 15,16, 18 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Conclusion

Examiners note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.
